Choose the Ultimate Solution

Cyspersa®

POWER BRIGHT SERIES

Pigmentary lesions are one of the most common skin issues, encompassing various types such as lesions resulting from skin inflammations, freckles and melasma, pregnancy-related pigmentation, sun-induced pigmentation, and age-related pigmentation

In the treatment of pigmentation, hydroquinone and corticosteroids are frequently employed, which themselves may lead to side effects such as sensitivity, skin irritation, carcinogenicity, recurrence of pigmentation, and the development of treatment-resistant dark spots

As part of an anti-pigmentation therapeutic routine, Cyspersa, utilizing an innovative formulation of liposomal Cysteamine and other effective and low-impact ingredients, can effectively address this problem with minimal side effects

Cyspersa Correction Routine

1 Targeted treatment

- Application of the Cyspersa Liposomal Cysteamine Pigment Corrector Cream at the site of pigmentation to reduce dark spots and discoloration.
- Application of the Cyspersa Eye Revive Fluid to reduce the appearance of fine lines, wrinkles, and dark circles in the eye contour.

2 Daily Skin Wash

A complementary treatment for skins under a daily correction routine with Cyspersa Gentle Wash

3 Daily Protection

A comprehensive protection against wide-spectrum sun rays with Cyspersa Sun Defense SPF50+ Fluid and Cyspersa Sun defense SPF50+ Natural Tinted Cream

LIPOSOMAL 5%
CYSTEAMINE
Pigment Corrector Cream

Cypersa Liposomal Cysteamine Cream

This product contains a liposomal cysteamine complex along with brightening and antioxidant compounds such as alpha-arbutin, vitamin C, and niacinamide. Together with liposomal cysteamine, this forms a powerful, effective, and safe combination for treating pigmentation.

Product Features:

- Effective in treating various types of facial and body pigmentation and dark spots
- Effective in treating pigmentation resistant to other treatments
- High skin penetration and chemical and biological stability of cysteamine due to the use of liposomal technology
- High compatibility with the skin, with minimal likelihood of intolerance
- Maximum effectiveness with minimal safety risks
- Free from side effects associated with hydroquinone and corticosteroids
- Devoid of cellular toxicity and non-carcinogenic
- Suitable for all skin types

Effective Ingredients:

Liposomal Cysteamine 5%

Cysteamine is a natural antioxidant and powerful brightening agent found in the milk of mammals. To enhance its stability and penetration into the epidermal layers of the skin, the Cypersa anti-pigmentation cream is formulated with innovative liposomal technology, thereby increasing its effectiveness. Liposomal cysteamine inhibits the tyrosinase enzyme, crucial in melanin (skin pigments) production, reducing excessive melanin production.

Alpha-Arbutin, Vitamin C, Niacinamide:

The combination of these three antioxidants, along with liposomal cysteamine, significantly enhances the effectiveness of pigmentation treatment. According to conducted research, 90% of users achieve desirable results

Usage Instructions:

Before application, cleanse the skin. If skin cleansing is needed, wait at least one hour before use. Apply a thin layer of the cream to the pigmented area. Depending on your skin type, wash it off with Cyspersa cleansing gel after the specified time:

Dry and sensitive skin: After 10 minutes

Normal skin: After 10 to 15 minutes

Oily skin: After 15 to 20 minutes

Therapeutic Phase:

Apply continuously once daily for 16 weeks. After one and a half months of using the Cyspersa anti-pigmentation cream, and in the absence of skin irritation symptoms such as redness or dryness, gradually increase the application time on the skin (up to a maximum of 20 minutes).

Maintenance Phase:

After the therapeutic phase, for skin care and prevention of reoccurrence of pigmentation, use twice a week.

X Contraindications:

For external use only

Avoid use around the eye area

Not recommended for individuals with a history of vitiligo

As a precaution, not recommended for use by pregnant and lactating women

Discontinue use in case of sensitivity and consult a physician

LIPOSOMAL
RETINAL-VIT K1
Eye Revive Fluid

Cyspersa Eye Revive Fluid

Cyspersa Eye Revive Fluid is an advanced formulation specifically designed for the delicate eye contour area. This scientifically engineered treatment targets the three major signs of under eye aging, dark circles, puffiness, and fine lines, through a synergistic combination of clinically validated active ingredients delivered via liposomal technology for enhanced penetration and minimized irritation.

The synergistic effects of these ingredients make Cyspersa Eye Revive Fluid an effective adjunct in comprehensive brightening protocols, with visible results typically observed after 6-8 weeks of regular use.

**LIPOSOMAL
RETINAL-VIT K1**
Eye Revive Fluid

Product Features:

Combines Retinal, Vitamin K1, Caffeine, Niacinamide, and Peptides to support collagen renewal, improve microcirculation, and energize the skin.

Provides deep hydration, antioxidant protection, and barrier repair to restore a brighter, smoother, and more refreshed eye contour.

Gentle yet powerful formulation suitable for the delicate and sensitive under eye area.

Helps visibly reduce signs of fatigue and aging with continued daily use.

Free from hydroquinone and steroids, non-carcinogenic, and suitable for all skin types.

Effective Ingredients:

Liposomal Vitamin K1

Improves microcirculation and strengthens capillaries to visibly reduce vascular dark circles and brighten the under eye area.

Encapsulated Retinal

A potent Vitamin A derivative that accelerates cell turnover and stimulates collagen synthesis, helping reduce fine lines and wrinkles with minimal irritation.

Caffeine

Stimulates circulation, reduces fluid retention, and helps minimize puffiness and signs of fatigue.

Palmitoyl Tetrapeptide-7

Reduces inflammation and supports collagen renewal for firmer skin and fewer fine lines.

Niacinamide

Strengthens the skin barrier, improves hydration and elasticity, and reduces pigmentation.

Lactobionic Acid (PHA)

Hydrate and protects with antioxidants, promoting smoother, brighter skin.

Usage Instructions:

Apply Cypersa Eye Revive Fluid **at night** to cleansed and dry skin. Dispense one pump and gently roll the fluid along the under-eye contour from the inner to outer corner. Daily use of a broad-spectrum sunscreen (SPF 30 or higher) is strongly recommended during daytime.

Optimal results are achieved when used as part of the CypersaPowerBrightRoutine:

Correct: Cypersa Eye Revive Fluid

Cleanse: Cypersa Lightening Gentle Cleanser

Protect: Cypersa Sun Defense SPF50+

X Safety Profile and Contraindications

Mild redness, tingling, or dryness may occur during the first weeks of use. These effects are transient and typically resolve with continued use or by adjusting application frequency.

Children and adolescents under 18 years of age

Pregnant or breastfeeding women (unless approved by a physician)

Individuals with known hypersensitivity to any of the ingredients

Avoid direct contact with eyes.

Discontinue use if persistent irritation occurs.

Adequate sun protection is essential to prevent photo-induced damage and ensure treatment efficacy.

Second Step:

Cyspersa Anti-Pigmentation Cleansing Gel:

The use of an appropriate cleanser is a crucial step in the pigmentation treatment routine. Due to the skin's sensitivity and reactivity resulting from the use of anti-pigmentation products, the choice of an unsuitable cleanser can impede the desired treatment-outcomes.

Product Features:

- Mild, sulfate-free cleanser
- Suitable for cleansing sensitive areas around the eyes and eyelids
- Anti-pigmentation properties
- Skin brightening capabilities
- Contains soothing and anti-inflammatory ingredients
- Thick and cost-effective
- Suitable for all skin types

Usage Instructions:

Apply a sufficient amount of Cyspersa Cleansing Gel to wet skin.
Massage in circular motions, then thoroughly rinse.

Effective Ingredients:

1-Niacinamide

Anti-inflammatory, anti-pigmentation, and regulates skin oil secretion

2-Alpha-Arbutin

Skin brightening and reduces various types of skin pigmentation

3-Alpha-Bisabolol

Anti-inflammatory, moisturizing, and antioxidant

4-Dexpanthenol (Pro-Vitamin B5)

Anti-inflammatory and skin-repairing

5-Sulfate-Free Natural Cleansers

SUN 50⁺ DEFENSE

UVA/UVB/IR Protection

Second Step:

Cyspersa Anti-Pigmentation Sunscreen SPF50+

The use of a high protection factor sunscreen is one of the most crucial steps in pigmentation treatment. In individuals predisposed to pigmentation, repeated exposure to harmful solar radiation (UVA, UVB, IR, VL) can lead to the recurrence of pigmentation and skin darkening even after achieving the desired treatment results.

Therefore, during treatment and after obtaining satisfactory results from anti-pigmentation therapy, the appropriate use of high protection factor sunscreen is essential. You can choose one of Cyspersa's sunscreens based on your specific needs.

Cyspersa Brightening Natural Tinted Sunscreen SPF50+

Cyspersa's tinted sunscreen, enriched with effective ingredients such as Vitamin C, tranexamic acid, and niacinamide, not only provides protection against the harmful effects of solar radiation, free radicals, and pollutants but also has brightening effects. Through regular use, it reduces skin darkening and uneven pigmentation, ensuring the health and beauty of the skin.

The natural and warm tone of this product enhances the beauty of various skin tones .

Product Features:

- High protection factor SPF50+ sunscreen
- Cares for and protects the skin against a broad spectrum of harmful solar radiation (UVA, UVB, IR, VL)
- Anti-pigmentation properties
- Skin brightening capabilities
- Contains soothing and anti-inflammatory ingredients
- Skin rejuvenating
- Provides complete coverage with a natural tint

Effective Ingredients:

Vitamin C:

Brightening and rejuvenating

Tranexamic Acid:

Anti-pigmentation and anti-inflammatory.

Niacinamide:

Anti-inflammatory, anti-pigmentation, and regulates skin oil secretion

Usage Instructions:

Apply a sufficient amount to dry and clean skin 30 minutes before sun exposure.

For increased effectiveness, during the pigmentation treatment process, reapply every 3 hours and every 2 hours when exposed to sunlight.

Cypersa Brightening Sunscreen Fluid SPF50+

Cypersa's fluid sunscreen is water-based, resulting in an extremely lightweight texture with rapid absorption. Additionally, it does not create a heavy feeling on the skin and can be applied on wet skin. Enriched with effective ingredients such as Vitamin C, niacinamide, and neutrazen, this sunscreen not only protects the skin from the harm effects of solar radiation, pollutants, and free radicals but also provides brightening effects. Through regular use, it reduces skin darkening and uneven pigmentation, ensuring the health and beauty of the skin tones.

Product Features:

- Fluid sunscreen with high protection factor SPF50+
- Cares for and protects the skin against harmful solar radiation (UVA, UVB, IR, VL)
- Very lightweight texture with fast absorption
- Free from acne-causing ingredients
- Suitable for use around the eyes without causing sensitivity
- Can be applied on wet skin without creating shine
- Anti-pigmentation and skin brightening
- Contains soothing and anti-inflammatory ingredients
- Skin rejuvenating
- Suitable for all skin types, even sensitive skin

SUN 50⁺ DEFENSE

UVA/UVB/IR Protection

Effective Ingredients:

Vitamin C:

Brightening and rejuvenating

Niacinamide:

Anti-inflammatory, anti-pigmentation, and regulates skin oil secretion

Neutrazen:

Strong anti-inflammatory

Usage Instructions:

Apply a sufficient amount to clean skin 30 minutes before sun exposure

For increased effectiveness, during the pigmentation treatment process, reapply every 3 hours and every 2 hours when exposed to sunlight
